

# THE PERFORMANCE PUTTING STUDIO

SEE IT. ROLL IT. HOLE IT.®

by Brett Saunders & Scott Rodgers

The putter... the most used club in the bag but the most overlooked part of the average golfer's practice.

Golfers around the world are using the technology available in today's market to help analyze and improve their golf swing. However, when it comes to putting, we simply opt to buy another putter with little more than hope as to whether it will truly improve our putting performance.

Now with comparable technology for putting, we can evaluate and develop all the elements affecting their their performance on the green, including...

- Putter Face Angle
- Ball Speed
- Launch Angle
- Putter Face Rotation
- Impact Location
- Putter Path
- Putter Face Alignment
- Attack Angle
- Forward or Backwards Rotation Speed
- 3D Ball Spin Characteristics
- Vertical Bounce
- True Roll & Skid
- Green Reading
- Practice Plans
- Tournament Preparation Skills

The question we ask our players is simple... do you know the difference between a good putt and a poor putt?

Without feedback on the launch conditions of each putt and developing a deep sense of creativity, perception, and feel, it becomes very difficult to answer this question. Allow our coaching staff to develop a personalized improvement plan combining both the art and the science of putting, resulting in **LESS PUTTS and LOWER SCORES... PERIOD!**

"The software measures the performance of the golf ball, which at the end of the day, is what matters..."

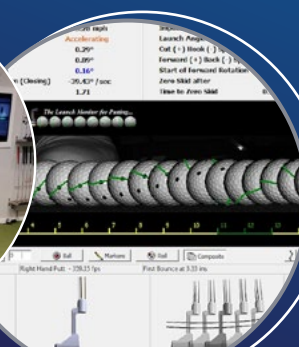

**Dr. Paul Hurrion,**

Quintic Founder & CEO

Past & present students include PGA & European Tour Players, Padraig Harrington, Rory McIlroy, Danny Willett, and Robert-Jan Derksen
